## Introductions

**Farm fencing** is also a kind of popular fence for fields or agriculture, also called farm fence or grassland fence, deer fence. It is woven by high tensile hot dipped galvanized with zinc coating above 200g/m<sup>2</sup>. It is a type of very economical fence for the farm, orchard, fields, grasslands, forest zone ...etc. The formation of the field fencing is automatic twist plait by the line wire and the cross wire. So the fencing mesh is knotted. And the spacing between the line wire is different, smaller spacing in the bottom of mesh panel, then the spacing become much more bigger than the the bottom one. To design like that is to protect the little rodents or animals from getting through.

Farm fence can be woven with different types of knots: fixed knots, hinge joint knots or other custom patterns.

**Hinge joint fence** is a kind of fence, whose top and bottom wires are made of 2.5mm diameter wire, and the tensile strength is greater than or equal to 710N/mm<sup>2</sup>. The other wires are made of 1.9mm diameter wire, and the tensile strength is 440-540N/mm<sup>2</sup>.

**Fixed knot fencing** is a kind of fencing, usually made of high-strength galvanized steel wire. The wire is knitted into a grid-like structure through a special knitting machine, and then fixed and supported by a steel frame. It is widely used in stadiums, squares, playgrounds, amusement parks and other places.

## Posts

**The farm fencing post** is to use the angle steel, to make holes on the angle steel, which is used to tie the fence panel with the post. And it can use the wooden stake to replace the angle steel. To fix the post and the fence panel together is using the galvanized wire.

All in all, the formation of the field fencing is not complex, and it is also very economical and save the production cost. It is a quite good choice to choose the field fencing.

### Classification of fence

Agricultural fence (such as **horse fencing**, **livestock panel fence**);  
Ranch fence (such as sheep fencing, goat fence, deer fence and cattle fence);  
Grassland fence (such as border fence).

### application

Farm, Field fence has many widely range uses almost covering each corners in our lives. Field fences are mainly used for barriers in ranch construction, grazing and feeding of animals in agriculture farm and grassland fence;

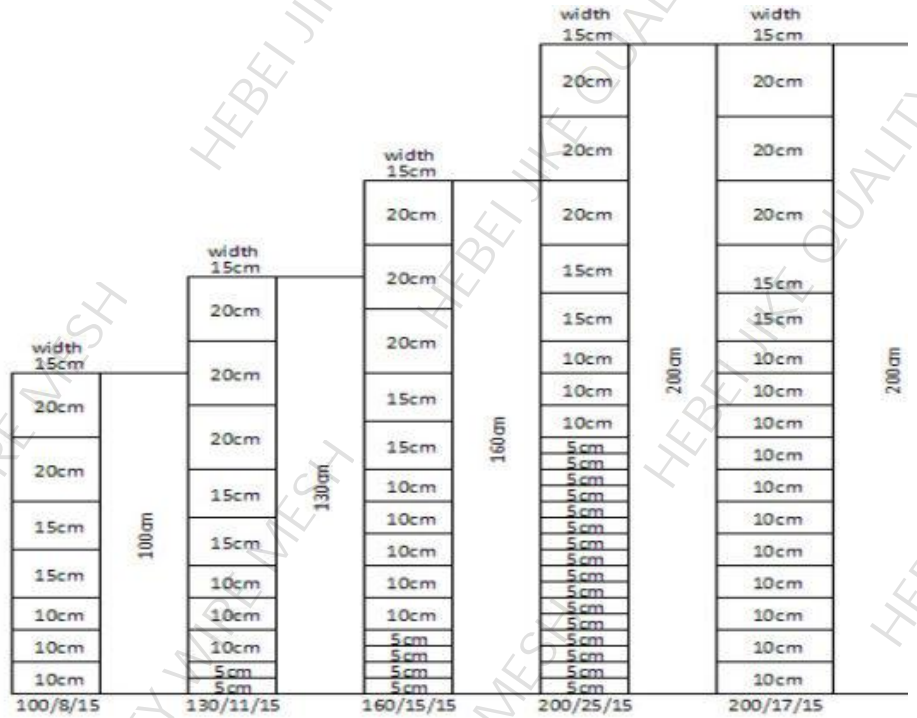

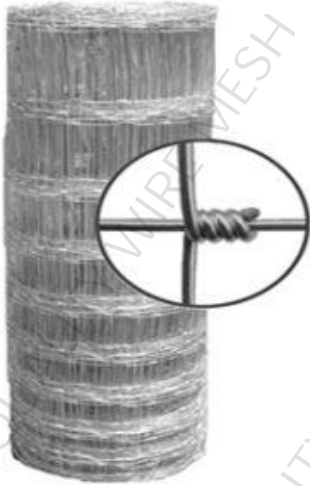

Used for protection of natural environment.

### Specifications

Materials: zinc-aluminium alloy wire (Galfan wire) or galvanized steel wire, both high tensile wire.

Hinge Joint Field fence (cm)		100/8/15	130/11/15	160/15/15	200/25/15	200/17/15
Height (cm)		100	130	160	200	200
Horizontal wires number		8	11	15	25	17
Roll Length (m)		50	50	50	50	50
Ø wire 2.5mm; Ø top and bottom wire 2.5mm	mesh opening width (cm)	15, 30	15, 30	15, 30	15, 30	15, 30
	Roll weight (kg)	17	26	35	52	40
Note: the following sizes also can be manufactured by your order : 200/22/15; 200/17/15; 180/24/15; 160/23/15; 150/13/15; 140/22/15; 140/11/15						

**Fixed knot farm fence**

**Materials:** zinc-aluminium alloy wire (Galfan wire) or galvanized steel wire ,both hightensile wire
