Hex netting is a twisted steel wire mesh with hexagonal openings. Our hex netting is available in many mesh sizes with a variety of width and length sizes. It is a widely used and versatile mesh that can be used for animal traps, chicken coops, insulation backing or other wire fencing for animals.

Features of Hex Netting:

- Good ventilation
- Solid construction
- Extremely versatile
- Easy to install
- Easily cut to fit
- Available in many materials and sizes

Hex netting is commonly known as chicken wire, poultry wire, poultry netting, and hexagonal mesh. Hex netting is a widely used and versatile wire mesh. It is often used to build chicken coops or other fencing for chickens or other animals. Additionally, hex netting is an economical product used to secure other materials in place, such as insulation to roofs. Hex netting is also ideal for lawn and garden and other home projects.

Various applications that hex netting can be used for:

- Wire mesh fencing
- Wire mesh chicken coops
- Poultry hex netting
- Flood control hex netting
- Construction reinforcement hex netting
- General purpose wire netting
- Wire mesh window guards
- Wire mesh tree guards
- Trellis for climbing plants and flowers
- Framework for sculpture and float decorations

Hexagonal Wire Mesh

Required parameter

- a: Material
- b: Anti-corrosion Treatment:
galvanized, plastic coated
- c: Wire Diameter
- d: Pore Diameter/Aperture
- e: Twist Method
- f: Roll Width
- g: Roll Length

e: Weaving method:
double-direction twist

e: Weaving method:
normal twist
