

● Detail Description

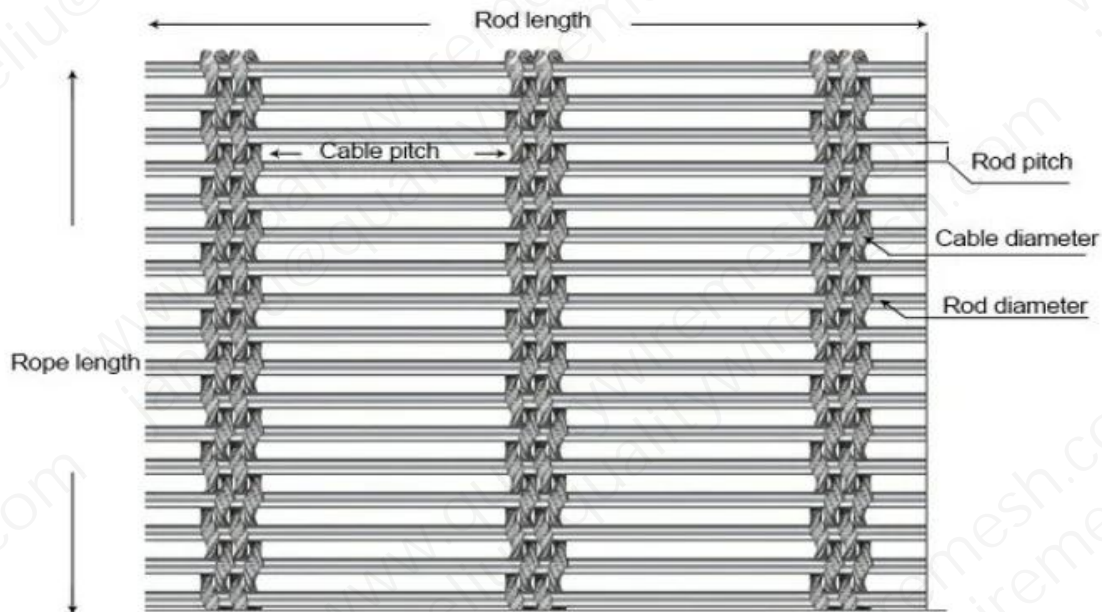

Cable-rod woven mesh is produced by steel rod and stainless steel cable together, and it is flexible in the one longitudinal direction, whilst remaining rigid in the other latitudinal direction. The cable-rod woven mesh has a diverse range of uses, depending on the pattern, grade of material, orientation, wire & aperture sizes. Cable-rod woven mesh is very artistic and normally used as the facade for buildings, inner-door partition walls, ceilings decoration, sunlight-shade, handrail infills, and other high-grade interior decoration for hotels, offices, exhibitions and stores.

● Product Features

Very large mesh size, suitable for large area installation.

Good sun-shade effect, can help to adjust building temperature.

Good mesh appearance, and has good decorative effect.

Item	Cable Dia.	Cable pitch	Rod Dia.	Rod Pitch	Public Occasion	Thickness	Weight
